

CLASS' GUIDE

Unit 1: Computers Today

Structure:

- Parts of Speech

Information:

- Living in a Digital Age
- Language Work: Collocations
- Computers at Work

WEEK 1		
Activity	Development	Time
GREETINGS	Welcome the students. Introduce Unit I The developed contents of the week.	5 minutes
REVIEW	On slide 4, begin with practice related to the parts of the computer; allowing students to recall the vocabulary studied.	10 minutes
	On slides 5-14, develop a reminder about parts of speech; key points to exemplify what the students have read during the week.	10 minutes
	On slide 6, review the use of nouns, adjectives, adverbs, etc., using a crossword.	12 minutes
	On slides 15-16, exemplify the different uses that a word can acquire in English depending	10 minutes

	on the context. In addition, a practice on the topic will be developed.	
	On slides 21-22 , develop in a general way the topic of collocations and their examples.	10 minutes
RESOLUTION OF ACTIVITIES WEEK 1	On slides 18-20 , answer the first practice of the week, regarding the reading where the function of the list of words must be identified; also, complete the match between the vocabulary and the definitions.	13 minutes
	On slide 23 , give an answer to practice 2, where the students had to match the vocabulary to form a collocation.	13 minutes
	On slide 24 , develop practice 3, where the students according to the reading were to place true or false in the statements.	13 minutes
FEEDBACK	-Students have the opportunity to ask the corresponding questions.	5 minutos

SOLUTIONS OF THE ACTIVITIES ASSIGNED TO THE STUDENTS:

PRACTICE TIME

Practice 1: Word List for Classification:

a) development	Noun	i) optimize	Verb
b) rapidly	Adverb	j) stability	Noun
c) evolving	Verb	k) integrity	Noun
d) skilled	Adjective	l) continuously	Adverb
e) scalable	Adjective	m) collaboration	Noun
f) analyze	Verb	n) implement	Verb
g) cybersecurity	Noun	o) innovative	Adjective
h) frequently	Adverb		

PRACTICE TIME

•Matching Words with Definitions

Instructions:

Match each word from the list with the correct definition.

a. development	b. rapidly	c. Evolving	d. skilled	e. Scalable
f. Analyze	g. cybersecurity	h. Frequently	i. Optimize	j. Stability
k. integrity	l. continuously	m. collaboration	n. implement	o. innovative

- To improve something for maximum efficiency or performance. **Optimize**
- The process of creating, improving, or maintaining software. **Development**
- Happening very quickly or in a short time. **Rapidly**
- Occurring often or at regular intervals. **Frequently**
- Changing and developing gradually over time. **Evolving**
- To put a plan or system into action. **Implement**
- Featuring new methods, ideas, or approaches. **Innovative**
- Having expertise or proficiency in a particular area. **Skilled**

•Matching Words with Definitions

Instructions:

Match each word from the list with the correct definition.

a. development	b. rapidly	c. Evolving	d. skilled	e. Scalable
f. Analyze	g. cybersecurity	h. Frequently	i. Optimize	j. Stability
k. integrity	l. continuously	m. collaboration	n. implement	o. innovative

- The process of working together to achieve a common goal. **Collaboration**
- The state of being steady, secure, and reliable. **Stability**
- Capable of handling increased workloads or expansion. **Scalable**
- To examine something in detail to understand it better. **Analyze**
- The quality of being honest and having strong principles; in computing, ensuring data accuracy and consistency. **Integrity**
- The practice of protecting systems and data from cyber threats. **Cybersecurity**
- Without stopping or interruption. **Continuously**

Practice 2: Software Engineering Collocations

Instructions:

Match the words in **Column A** with the correct words in **Column B** to form common collocations used in software engineering.

Column A	Column B
Write	Features
Debug	Updates
Develop	Algorithms
Gain	Software
Implement	Bugs
Optimize	Code
Protect	Performance
Design	Security
Improve	Application
Deploy	Experience

- Write code
- Debug bugs
- Develop software
- Gain experience
- Implement security
- Optimize performance
- Protect application
- Design algorithms
- Improve features
- Deploy updates

Practice 3: Computers Today

DIRECTIONS: Decide whether the following statements are **TRUE** or **FALSE** according to the previously reading.

- Computers are less important today than in the past. **FALSE**
- Smartphones and tablets can function as computers. **TRUE**
- Cloud computing allows people to store and access data from anywhere. **TRUE**
- Artificial intelligence has no impact on modern software. **FALSE**
- Cybersecurity is no longer a concern in today's digital world. **FALSE**
- Computers today are faster and more powerful than before. **TRUE**
- People can only access cloud computing from their office. **FALSE**
- Hackers continue to create new threats to steal information. **TRUE**
