SEMESTRE I - 2025

UNIT 4	gerunds phrases
WEEK 13	TOPICS: choosing the right display devices ergonomics

LEARNING OBJECTIVES:

At the end of the class, SWBAT:

- 1. identify key ergonomic features of display devices that promote health and comfort when using computers.***
- 2. interpret a short informational text about choosing appropriate display devices with ergonomic considerations.***
- 3. use and define vocabulary related to ergonomics and technology***
- 4. recognize and correctly use gerunds as subjects, objects, and subject complements in sentences.***

UNIT 4

DISPLAY SCREENS AND ERGONOMICS

WEEK 13

WEEK 13

GRAMMAR FOCUS

gerund(s) phrase(s)

TOPICS AND VOCABULARY

choosing the right
display devices
ergonomics

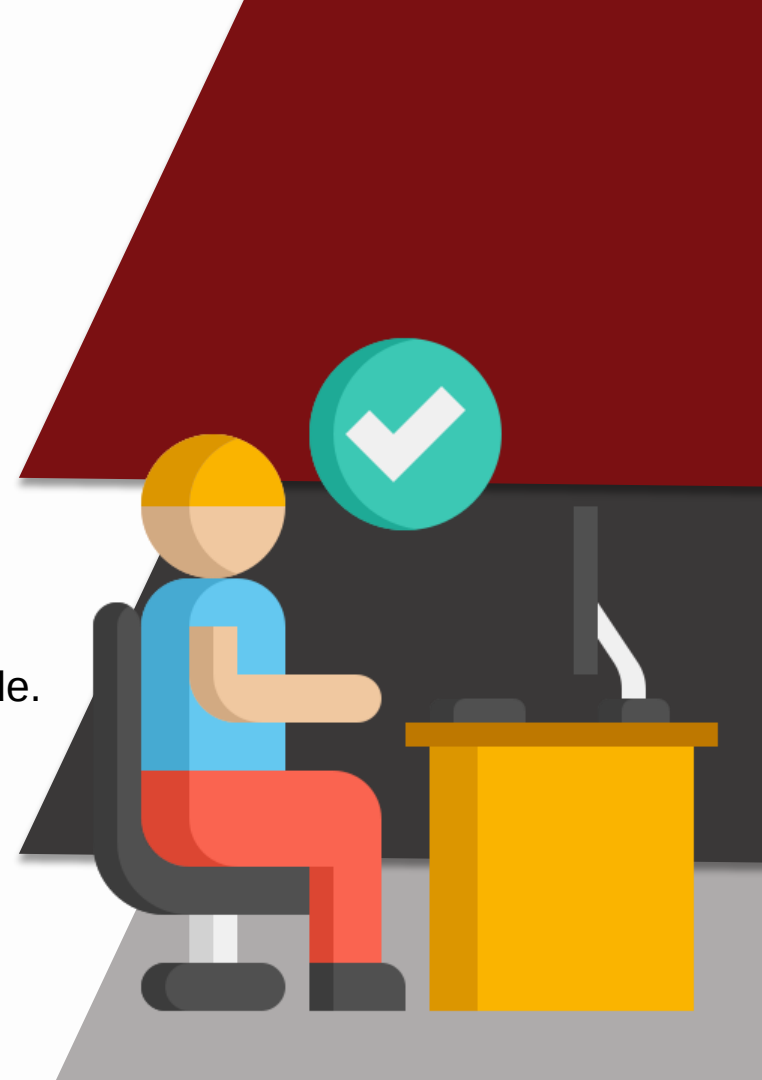

Gerunds

A **gerund** is a verb ending in **-ing** that **functions as a noun** in a sentence.

Examples:

- **Reading** helps you learn.
- **Typing** for long hours can cause wrist pain
- I am really interested in **learning** how to program.
- **Watching** the screen closely can hurt your eyes.
- I enjoy **learning** English.
- One of my goals is **passing** this subject with a good grade.
- **Sitting** for long hours can cause back pain.
- My friends are so good at speaking English.
- **Adjusting** the monitor improves posture.

GERUND AS A SUBJECT

When a gerund acts as the subject, it comes at the beginning of a sentence and tells what the sentence is about.

- ❑ **Using** two monitors improves productivity.
- ❑ **Sitting** with poor posture can lead to back pain.
- ❑ **Adjusting** the screen brightness helps reduce eye strain.
- ❑ **Staring** at the screen too long is not healthy.
- ❑ **Installing** a larger monitor makes work easier.
- ❑ **Positioning** the display at eye level is important for good ergonomics.
- ❑ **Working** under poor lighting causes fatigue.

GERUND AS AN OBJECT

A gerund can be the object of a verb or a preposition.

- ◆ As the object of a verb:

- ❑ I enjoy **using** a high-resolution monitor.
- ❑ Roxy avoided **adjusting** the screen settings

- ◆ As the object of a preposition:

- ❑ Mario is interested in **improving** his workstation setup.
- ❑ Those people talked about **replacing** the old monitor.

VERBS COMMONLY FOLLOWED BY GERUNDS

- enjoy → I enjoy **reading** tech blogs.
- avoid → Lupe avoids **sitting** for too long.
- finish → Diego finished **setting up** the monitor.
- keep → Those students keep **adjusting** the screen angle.
- suggest → I suggest **taking** regular breaks.
- consider → I considered **buying** a bigger screen.
- dislike → Diana dislikes **working** in poor lighting.
- practice → Pablo practices **typing** every day.
- recommend → I recommend **using** an ergonomic chair.
- mind (usually in questions/negatives) → Do you mind **closing** the window?

These verbs are
followed by
another verb
form: GERUND

PREPOSITIONS + GERUNDS

- **interested in** → *Juan is interested in **learning** about display settings.*
- **good at** → *I am good at **adjusting** the monitor height.*
- **worried about** → *Those students worried about **hurting** their eyes.*
- **tired of** → *I'm tired of **working** without breaks.*
- **instead of** → *Use a laptop stand instead of **bending** your neck.*
- **before** → *Stretch your arms before **typing**.*
- **after** → *Take a break after **staring** at the screen for hours.*
- **without** → *Juanita left without **saving** the file.*
- **by** → *You can reduce strain by **using** a larger font.*

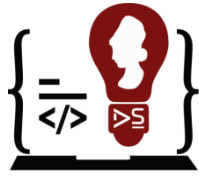

In English, when a **preposition** is followed by the **-ING FORM**.

GERUND AS A SUBJECT COMPLEMENT (PREDICATE NOUN)

A gerund can follow a linking verb like **be**, and it renames or describes the subject.

- ☐ My favorite activity is adjusting my display for comfort.
- ☐ The biggest problem is sitting for too long.
- ☐ My dream is working as an engineer in another country.

**DESARROLLO
DE SOFTWARE**

EXERCISE 1: SENTENCE COMPLETION

DIRECTIONS:

Complete the sentences with the correct gerund form of the verb in parentheses. Then, identify if the gerund functions as a **SUBJECT (S)**, **OBJECT (O)**, or **SUBJECT COMPLEMENT (C)**.

*Practice
makes
Perfect*

SENTENCE	VERB	FUNCTION
_____ every 30 minutes is good for your eyes.	take breaks	
I enjoy _____ the display settings.	adjust	
Her favorite activity is _____ presentations on Canva.	create	
My classmates and I avoided _____ in a dark room.	work	
_____ close to the screen can damage your vision.	sit	
Carlos doesn't mind _____ his chair often.	move	
One problem is _____ too long without blinking.	stare	
Wilfredo suggested _____ an anti-glare screen.	install	
I usually put off _____ my homework assignments.	do	

READING ACTIVITY

**CHOOSING THE RIGHT
DISPLAY DEVICES:
FOCUS ON
ERGONOMICS**

When working or studying for long hours on a computer, choosing the right display device is very important. One of the main reasons is **ergonomics**—the science of designing tools and furniture to help people work safely and comfortably.

A good display device can prevent **eye strain, neck pain, and back problems**. To choose the best one, consider the following ergonomic features:

1. SCREEN SIZE AND RESOLUTION

Larger screens with high resolution make it easier to read text and see images clearly. This reduces the need to squint or lean forward.

2. ADJUSTABLE HEIGHT AND ANGLE

The top of your screen should be at eye level. A display that tilts or adjusts in height helps you keep good posture and avoid neck strain.

3. BRIGHTNESS AND GLARE CONTROL

Monitors with adjustable brightness and anti-glare coating protect your eyes, especially in rooms with a lot of light.

4. BLUE LIGHT FILTER

Displays with a blue light filter or “night mode” can help reduce eye fatigue, especially when working at night.

5. DISTANCE AND POSITION

The screen should be about an arm’s length away. This helps reduce eye and neck strain. Always place the monitor directly in front of you.

Ergonomics plays a vital role in creating a comfortable and healthy work or study environment. Choosing the right display device is not just about having the latest technology—it's about protecting your body from long-term harm. A monitor that supports good posture, reduces eye strain, and allows proper screen positioning can make a significant difference in how you feel after several hours of use.

Ignoring ergonomic factors can lead to common health problems such as headaches, blurry vision, back and neck pain, or even long-term injuries like carpal tunnel syndrome. However, by selecting a screen with adjustable features, appropriate size and brightness, and anti-glare protection, users can avoid many of these issues.

In conclusion, investing in a good display device is an investment in your health and productivity. Whether you are a student, a professional, or a casual user, taking time to evaluate ergonomic features will help you stay focused, feel better, and work smarter every day.

INSTRUCTIONS: Decide whether each statement is true or false. Read carefully.

1. ___ Ergonomics is the science of making devices look more modern.
2. ___ A larger screen with high resolution can reduce the need to lean forward.
3. ___ The top of your screen should be below eye level.
4. ___ Anti-glare screens and brightness control help protect your eyes.
5. ___ The monitor should be placed about two meters away from your eyes.
6. ___ Blue light filters can help reduce eye fatigue.
7. ___ Ignoring ergonomics may cause health problems over time.
8. ___ Display devices have no impact on productivity.
9. ___ Having the right screen can improve posture and comfort.
10. ___ Ergonomics is only important for people who work in offices.

VOCABULARY SECTION

INSTRUCTIONS:

Match the words from the reading (Column A) with their correct definitions (Column B).

COLUMN A (WORD)	COLUMN B (MEANING)
1. ergonomics	a. not sharp or bright; not clear
2. eye strain	b. the ability to see clearly and in detail
3. posture	c. how your body is positioned while sitting or standing
4. resolution	d. a feeling of tiredness or pain in your eyes
5. glare	e. uncomfortable light that makes it hard to see
6. productive	f. getting a lot done; working efficiently
7. anti-glare	g. designed to reduce strong reflections from light
8. adjustable	h. can be changed or moved to a better position

GAP-FILLING ACTIVITY

Complete the sentences with the correct word from the vocabulary list above.

WORD BANK:

ergonomics – eye strain – glare –
posture – productive – resolution

- ☐ Good _____ helps prevent neck and back pain when using a computer.

☐ If your screen is too bright, you may suffer from _____.

☐ The _____ of the screen makes text and images look clear.

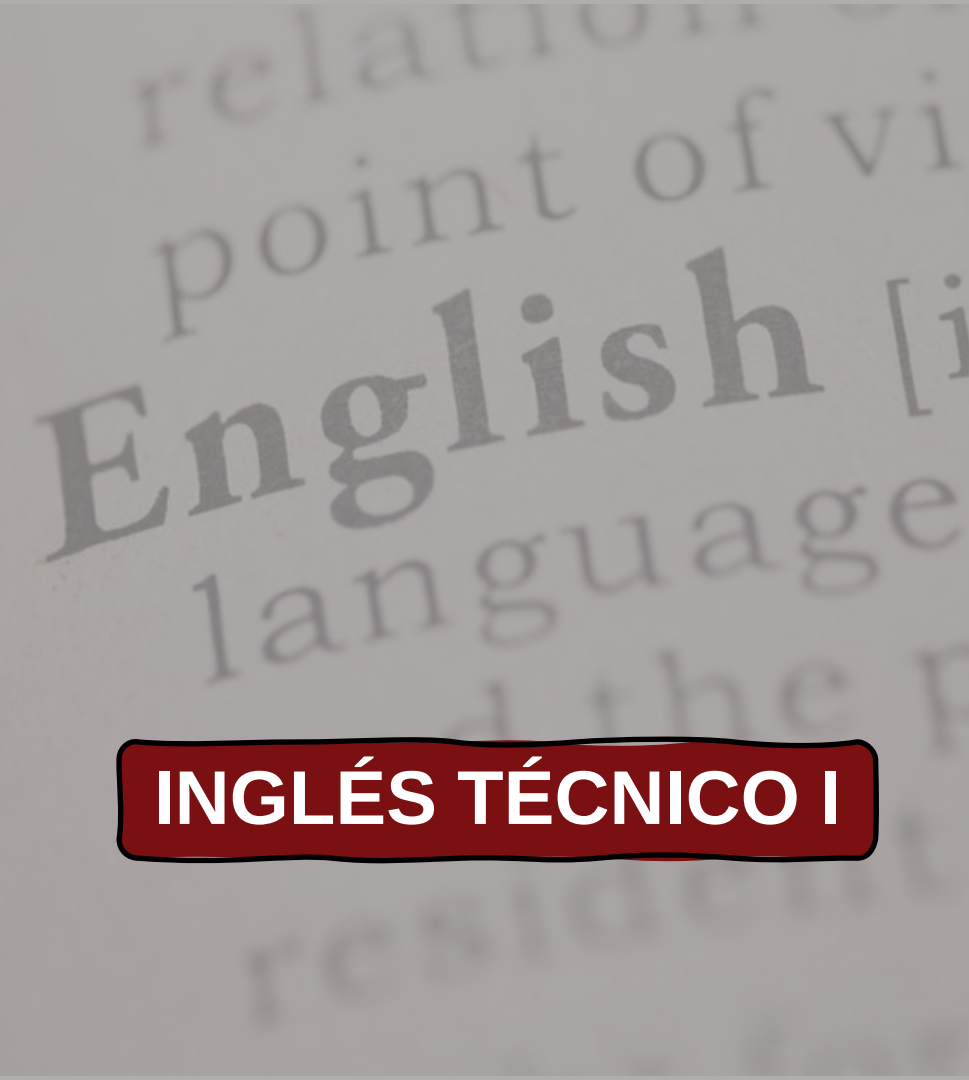

☐ Poor lighting can cause screen _____ and hurt your eyes.

☐ _____ is the science of designing comfortable workspaces.

☐ When you feel comfortable, you are usually more _____.
