

from APRIL 28th to MAY 04th

WEEK 10

UNIVERSIDAD DE EL SALVADOR

Facultad Multidisciplinaria De Occidente

Departamento de Ingeniería y Arquitectura

Ingeniería En Desarrollo De

Software/Educación En Línea

SEMESTRE I - 2025

UNIT 3	suffixes and prefixes
WEEK 10	TOPICS: the keyboard mouse actions

LEARNING OBJECTIVES:

At the end of the class, SWBAT:

1. Identify common prefixes and suffixes used in technology-related words.

2. Form new words using appropriate prefixes or suffixes.

3. Recognize and label the parts of a keyboard.

4. Understand and describe different mouse actions.

5. Practice reading and comprehension skills through a short passage about the keyboard.

UNIT 3

INPUT and OUTPUT DEVICES

WEEK 10

GRAMMAR FOCUS:

AFFIXES: suffixes and prefixes

TOPICS AND VOCABULARY:

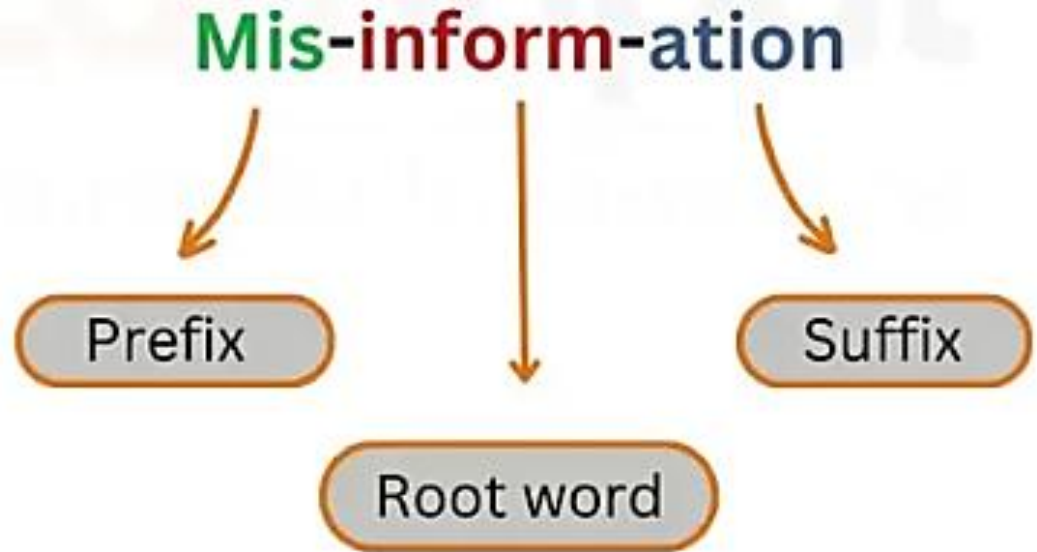

the keyboard

mouse actions

AFFIXES in ENGLISH

In English grammar and morphology, an **AFFIX** is a word element that can be attached to a base or root to form a new word, usually occurring as either a **PREFIX** or **SUFFIX**.

Put simply, an affix is a group of letters that are generally added to the beginning or the end of a root word that can change the word's meaning.

PREFIXES: added before the root word

Affixes

SUFFIXES: added after the
root word

A **PREFIX** is a group of letters that we add to the **beginning** of a word to change its meaning.

Prefixes

in English

For example:

- **do** → **re** + do = **redo** (do again)
- **load** → **pre** + load = **preload** (load before)

Here's a list of **10 common prefixes** with:

- the **prefix**
- a **word example**
- and the **meaning of the new word**

PREFIX	WORD EXAMPLE	MEANING OF PREFIX	NEW WORD MEANING
un-	undo	not / reverse	reverse an action
re-	redo	again	do something again
dis-	disconnect	opposite / not	not connected
pre-	preload	before	load something before
mis-	misclick	wrongly / badly	click in the wrong place
over-	overuse	too much	use something too much
under-	undercharge	too little	charge less than expected
auto-	autocorrect	self / automatic	correct by itself automatically
in-	inactive	not / without	not active or working
non-	nonworking	not	not working

Suffixes

-ion

-ment

A **suffix** is a group of letters added to the end of a word to change its meaning.

-less

Prefixes

One of the **main functions** of **suffixes** is that they can **CHANGE THE PART OF SPEECH** of a word — like turning a verb into a noun or an adjective into an adverb.

BASE WORD (PART OF SPEECH)	+ SUFFIX	NEW WORD (NEW PART OF SPEECH)
act (verb)	-or	actor (noun)
help (verb)	-ful	helpful (adjective)
happy (adjective)	-ness	happiness (noun)
quick (adjective)	-ly	quickly (adverb)
type (verb)	-ist	typist (noun)

Here's a list of **common suffixes** with:

- the **prefix**
- a **word example**
- and the **meaning of the new word**

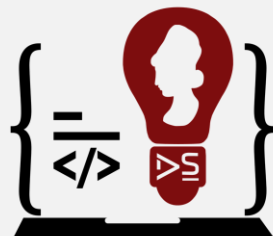

SUFFIX	WORD EXAMPLE	FUNCTION / MEANING	NEW WORD MEANING
-er	user	a person who does something	someone who uses something
-able	clickable	able to be	something that can be clicked
-ion	connection	state or process	the act of connecting
-ment	development	result or action	the process of developing
-less	wireless	without	without wires
-ful	helpful	full of	full of help / useful
-ness	kindness	state or quality	the quality of being kind

SUFFIXES CATEGORIZED BY PART OF SPEECH

Suffixes change:

- verbs into nouns 
- nouns into adjectives 
- adjectives into adverbs 

Ingeniería en Desarrollo
de Software

What are nouns?

- 1) things (table,
- 2) animals (cat, w
- 3)

✓ SUFFIXES THAT FORM NOUNS

These suffixes turn verbs or adjectives into **nouns** (things, people, ideas).

SUFFIX	MEANING	EXAMPLE	NEW WORD MEANING
-er/-or	person who does an action	teach → teacher	someone who teaches
-ist	person who practices something	type → typist	someone who types
-ness	state or quality	kind → kindness	quality of being kind
-ment	action or result	develop → development	process of developing
-tion/-sion	state or act	connect → connection	act of connecting
-ity/-ty	state or condition	active → activity	state of being active

✓ SUFFIXES THAT FORM ADJECTIVES

These suffixes turn verbs or nouns into **adjectives** (describing words).

SUFFIX	MEANING	EXAMPLE	NEW WORD MEANING
-ful	full of	help → helpful	full of help
-less	without	hope → hopeless	without hope
-able/-ible	can be	read → readable	can be read
-ous/-ious	full of / having	danger → dangerous	having danger
-ive	having the nature of	create → creative	full of creativity
-al	relating to	person → personal	related to a person

✓ SUFFIXES THAT FORM VERBS

These suffixes turn nouns or adjectives into **verbs** (action words).

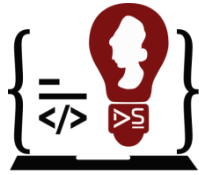

SUFFIX	MEANING	EXAMPLE	NEW WORD MEANING
-ize/-ise	to make or become	final → finalize	to make final
-en	to make or become	wide → widen	to make wide
-ify/-fy	to make	simple → simplify	to make simple

✓ SUFFIXES THAT FORM ADVERBS

These suffixes turn adjectives into **adverbs** (how something is done).

SUFFIX	MEANING	EXAMPLE	NEW WORD MEANING
-ly	in a way that is...	quick → quickly	in a quick manner

Ingeniería en
**DESARROLLO
DE SOFTWARE**

EXERCISE 1: CREATING WORDS with AFFIXES

DIRECTIONS:

Combine these affixes with the following BASE FORMS. In the event of not being sure, check a dictionary. Use the definition clue provided in each word.

*Practice
makes
Perfect*

PRACTICE

PREFIXE & SUFFIXES to use

pre-
un-
re-
-ful
-les
-er
-able
-ly
-ment

-ous
dis-
mis-
over-
in-
non-

- ☐ test – (a test before the real one)
- ☐ known – (not known)
- ☐ write – (write again)
- ☐ agree – (not agree)
- ☐ understand – (understand in the wrong way)
- ☐ work – (work too much)
- ☐ correct – (not correct)
- ☐ stop – (without stopping)
- ☐ care – (full of care)
- ☐ careful – (in a careful way)
- ☐ care – (without care)
- ☐ improve – (the act of improving)
- ☐ danger – (full of danger)
- ☐ develop – (a person who develops)
- ☐ edit – (can be edited)

EXERCISE 2: GAP-FILLING

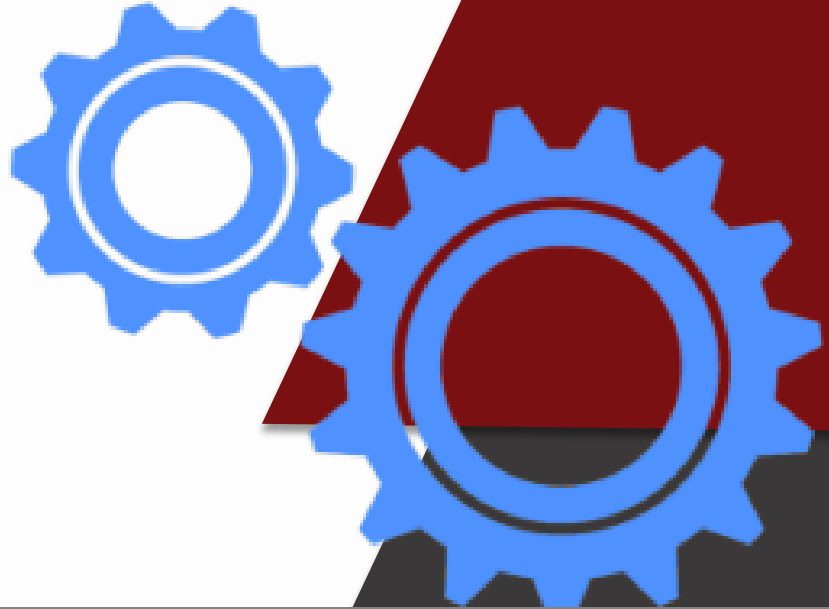

DIRECTIONS:

Complete the following sentence with the correct form of the previous words.

1. Before launching the app, the team always do a _____ to identify potential issues in the code.
2. The code you submit often contains _____ functions that need to be fixed.
3. The developer usually _____ the entire program when they realize there is a bug.
4. You should be _____ when sharing sensitive data online to avoid security risks.
5. The user interface should be designed _____ to ensure it is easy to navigate.
6. The software update brings a significant _____ in speed and functionality.
7. I think you _____ the instructions; the program is actually quite simple to use.
8. The website is _____ by the administrator, allowing them to make changes anytime.
9. After long hours of coding, many developers _____ and make simple mistakes.
10. I often _____ with my team about which programming language we should use for the project.
11. The origin of the virus that spreads through the network is still _____.
12. The system runs _____ to ensure maximum uptime.
13. The new software is _____ for most users, as it lacks a simple user guide.
14. The _____ creates new features for the software, but sometimes they miss important details.
15. It is _____ to release software without thorough testing, as it can lead to serious issues for users.

READING TIME

Read the **passage** about the keyboard. As you read, **underline or highlight** any new words or technical terms you don't understand. Then, work on the TRUE-AND-FALSE exercise.

A **keyboard** is one of the most important parts of a computer. It is a device that allows people to **communicate with the computer** by typing letters, numbers, and special characters. The keyboard looks like a typewriter, but it has more functions.

Most keyboards have around **100 to 105 keys**. These keys are divided into different sections. The main section includes all the **alphabet keys** (A to Z) and **number keys** (0 to 9). These are used for writing emails, doing homework, or chatting with friends online.

There are also **special keys** that perform different actions. For example:

- The **Enter key** is used to send a message or go to the next line.
- The **Space bar** is the long key at the bottom and is used to make spaces between words.
- The **Backspace key** deletes the letter to the left of the cursor.
- The **Shift key** is used to make capital letters or to type symbols like @ or \$.
- The **Caps Lock key** turns all the letters into capital letters when it is on.
- The **Control (Ctrl)** and **Alt** keys are used in combination with other keys to do special tasks like copying (Ctrl + C) or pasting (Ctrl + V).

A dark grey rounded rectangular button with the text "Pause Break" in white. "Pause" is on the top line and "Break" is on the bottom line, separated by a thin white horizontal line.

Pause
Break

A red rounded rectangular button with the text "Scroll Lock" in white. "Scroll" is on the top line and "Lock" is on the bottom line.

Scroll
Lock

A dark grey rounded rectangular button with the text "Print Screen" in white. "Print" is on the top line and "Screen" is on the bottom line.

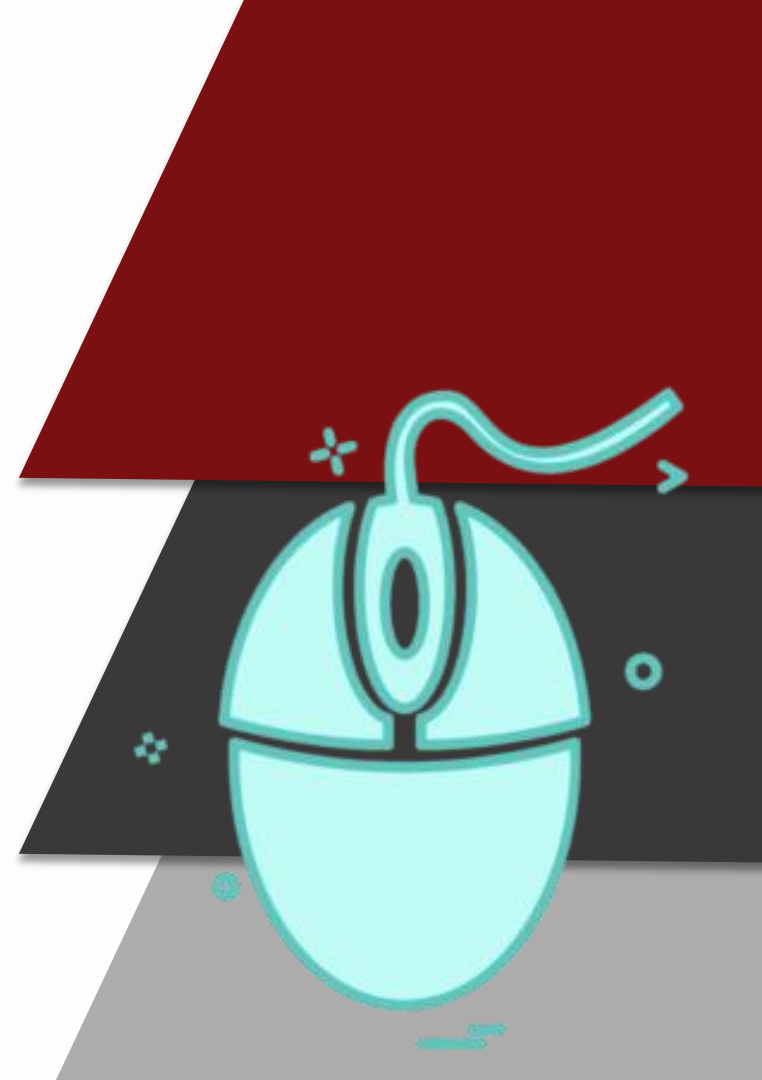

Print
Screen

At the top of the keyboard, there are **function keys** (F1 to F12). These keys have different jobs depending on the program. For example, F1 often opens a help menu.

On the right side, there is often a **numeric keypad**, which looks like a calculator. It helps people type numbers quickly, especially for data entry or math. There are two main types of keyboards:

- A **wired keyboard** connects to the computer using a USB cable.
- A **wireless keyboard** uses Bluetooth or a wireless receiver, and it does not need a cable.

Some keyboards are made for specific needs. For example, **gaming keyboards** have colorful lights and special keys for games. **Ergonomic keyboards** are designed to be more comfortable and help prevent injury when typing for a long time.

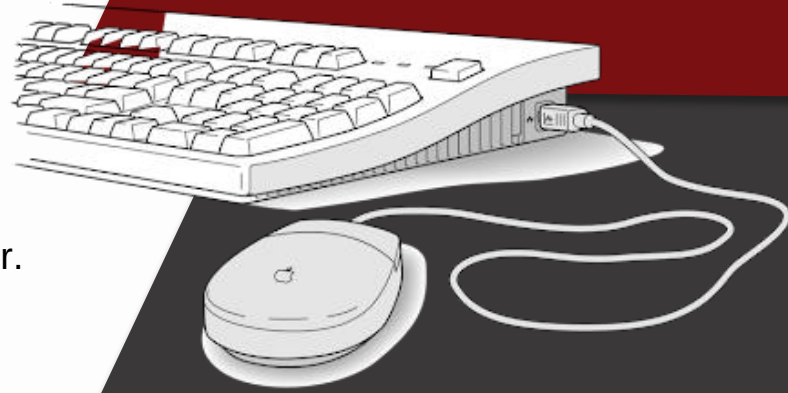

In conclusion, the keyboard is a very useful tool. It helps us write, search, play games, and do many other tasks on a computer. Learning how to use a keyboard well is an important skill for school and work.

✓ **TRUE or FALSE: The Keyboard (PC)**

DIRECTIONS: Read each sentence carefully. Write **T** for True and **F** for False.

1. ___ The keyboard is not important when using a computer.
2. ___ The space bar is the longest key on the keyboard.
3. ___ Function keys are labeled from F1 to F12.
4. ___ The Shift key is used to delete letters.
5. ___ The keyboard can only be used for writing emails.
6. ___ A wired keyboard uses a cable to connect to the computer.
7. ___ A wireless keyboard uses Bluetooth or a receiver.
8. ___ The numeric keypad is helpful for typing numbers quickly.
9. ___ The Control (Ctrl) key does nothing when used alone.
10. ___ Some keyboards are made especially for playing video games.

Matching Activity: The Mouse (PC)

Instructions: Match the **mouse action** in Column A with its correct **function** in Column B. Write the correct letter next to each number.

Column A – Mouse Action

1. Left click
2. Double click
3. Right click
4. Scroll the wheel
5. Drag and drop
6. Move the mouse

Column B – Function

- A. Opens a menu with more options
- B. Selects or clicks on something once
- C. Moves the pointer on the screen
- D. Opens a file or program quickly
- E. Moves an object from one place to another
- F. Goes up and down on a webpage or document

Please **investigate** the following computer-related verbs and be ready to explain what each one means because they are going to be used in a practice in your online meeting.

- click
 - type
 - tab down
 - press
 - drag and drop
 - scroll up
- scroll down
 - highlight
 - release
 - hold down
 - tap
 - slide
